COUNTRY OF ORIGIN: UK

The DIM-40DE-HC produces cubed ice, in the most popular sizeof 28 x 28 x 32 mm, slow-melting and much appreciated for itsmaximum cooling and minimal drink dilution.

Freshly produced ice cubes remain well protected in the icestorage area from contaminants, dust and light, hence maintainingthe highest quality. Cubes are dispensed automatically andhygienically by pressing the actuator button, conveniently locatedon the ice-dispensing panel. A dispense opening of over 20 cmallows for ample clearance for ice containers positioning. Icecubes spillage is minimized by the large drain pan, for easy andproblem-free ice dispensing.

This unit is manufactured with a new exterior design and finish, foreasy cleaning. The elegant light grey color of the ice-dispensearea greatly reduces the staining effect of water minerals.Ice cubes production and storage capacity is suitable for a widerange of applications, especially where self-service is preferable:hotel corridors, canteens & break-rooms, self-service areas, incombination with beverage and coffee vending, petrol stationsand convenience stores. Last but not least, in the healthcare sector.The dispensing mechanism may be easily automated to work inconjunction with trending self-serve and operator assistedbeverage vending. Quiet operation (< 45 dB) is ideal for hotelcorridors and ice rooms.
