

IM-65NE-HC-Q-SN

Ball Ice Maker, Self Contained

Production Capacity (kg/24h) - AT 10°C, WT 10°C: 28

Storage bin capacity: 17 kg

ICE TYPE: Ball

PRODUCT SERIES: IM 65
ITEM NUMBER: M066-D212

This self-contained cube ice maker uses Natural Refrigerant R290 which is environmentally friendly and energy efficient. This ice maker produces ball-shaped ice, tailored for the mixologists and cocktail bars that like to differentiate themselves and add to the full cocktail experience with the uniqueness of ice shapes without eliminating the purpose of properly cooling the drink with minimal dilution. Still part of our cube ice making system, fresh water is used for each cycle, ensuring only the highest quality of ice.

- Unique ice making system that has an automatic rinse cycle. After every new batch of ice, the water reservoir drains and refills with fresh water.
- The system comes with a magnetic water pump that has no direct coupling, which prevents any leakage.
- Closed water circuit offers the ultimate contamination protection, by reducing the number of points at which impurities can enter the ice making process.
- Electronically controlled to ensure an optimized ice making process under varying circumstances without the need for physical adjustments. Quality of ice is always consistent.
- An easily cleanable air filter allows end-users to carry out routine cleaning schedules. Extends product life expectancy and reduces the frequency and costs of maintenance call-outs.

EXTERIOR
Stainless Steel

Refrigerant type: R290
