Sushi display case with LED lighting, left-sided

PRODUCT SERIES: HNC, SUSHI CASES
ITEM NUMBER: S051-C174

This sushi case is made for the delicate way that sushi and its fresh ingredients are supposed to be handled. The eye-catching rounded glass window makes it an attractive display of the fresh ingredients that are used. The cooling system gives it the qualitative support that sushi requires, protecting the integrity but it is not intended to be used as a cooling storage cabinet. Food plates can be turned upside down and used to improve cooling performance. This model is also available in different sizes, in black and stainless steel with either left or right-handed side openings. With anti-scattering film for glass splinter protection.

AirflowThe airflow created by the refrigeration effect of the evaporator is smooth and diffused, without forced air-circulation, which would cause dehydration and weight loss, resulting in swift deterioration of the fish or other perishable displayed food.
Temperature ControlOne of the strikingly simple solutions for easy and fast temperature control: The inside tray can be flipped face up or face down to set the perfect inside temperature for different types of fish. The elevated side wings of the trays allow more air circulation, lowering the storage temperature instantly. A thermometer inside the cabinet helps you to monitor the inside temperature at all times.
Attractive DisplayThe tubular-shaped evaporator absorbs the heat continuously. Condensation freezes on its external surface, maintaining an attractive frost layer with no dripping. For extra illumination, the cases can be equipped with optional LED lighting.
ConvenienceThe practical anti-slip top is ideal to place serving trays. The condensing unit of all our models sits either on the right- or left-hand side, with the outflow of air positioned on the sides away from the operator.
Easy CleaningThe sliding door with 150 mm height and the lightweight ABS trays with a wave-shaped profile are easily disassembled and removed for daily cleaning.

Refrigerant type: R600a / Refrigerant: 0.032 kg
