With an energy consumption of 344 kWh/year (Energy test Ecodesign) the ECO TWIN K 82 ranks in energy class B. The Ecodesign test method records the 24 hour energy consumption and multiplies it by 365 to get the annual energy consumption (AEC). These new cabinets combine stylish design with high functionality and low energy consumption. • The controls are concealed behind the top panel, protected against splashing water. • Design principle of "no broken surfaces" makes the cabinets easy to clean. • The distinctive aluminum profiles stretching from top to bottom on both sides of the cabinet impart strength and enhance appearance. • The modular rails can go directly in the dishwasher • Pedal opener with finesse - read more in the brochure.
